

Safeplast NA Company, Ltd.

Safe - Spirals Protection for Hydraulic hoses

Safeplast hose protectors provide safe and economic protection of hydraulic and pneumatic hoses thereby reducing machine downtime and in some cases extending the life of the equipment itself. Safeplast protective spirals are produced from high-grade HDPE, the polyethylene is extruded into its final form utilizing technology that was developed by the Company. This production method gives the final product greater strength and durability along with smooth rounded edges, which are non-abrasive and easy to work with.

NEW

**Safe-Spiral ABRA - with wear indicator - new for
Spirals with an O.D. of 3/4" to 2.0"**

Safeplast Spirals

- *Temperature range - 60° F to + 175° F*
- *Made with Anti-Static and UV Protection additives*
- *Tolerates acids, oils and solvents*
- *Standard black and yellow colors*
